| Metal - Rigid conduit (coated) 6" minimum.  Nonmetallic - Rigid conduit 18" minimum.  Exception - Direct burial cable 24" minimum. (CEC Art. 300.5 Exceptions apply: i.e., 6" less depth for 2" concrete pad over cable. Residential branch circuits rated 120 Volts or less with GFCI protection and maximum overcurrent protection of 20 amperes maybe at 12". |                           | Metal -  (a) 6" above ground (uncoated and unwrapped).  (b) 12" below ground (factory coated or machine wrapped). Minimum cover shall be increased to 18" if external damage to the pipe from external sources is likely to result  Nonmetallic - (PVC or PE) - 18" min.  Note: Require approved plastic to metal transition fittings to rise above ground. Also, 18 GA. copper tracer wire required for non-metallic | Metal - No burial requirement (recommended 12" to protect from mechanical damage and freezing).  Nonmetallic (a) Pipe approved inside building - 12" minimum (b) Pipe approved inside building - sewer to be 12" below water line with water pipe 12" to one side on a solid shelf - total depth 24", and 12" apart horizontally minimum. | Metal - At or above grade, or 12" minimum below grade. Nonmetallic - 12" minimum (plastic). |
